MoH COVID-19 updates as of Sunday, March 22nd 2020.

- An additional 8 cases of COVID-19 infections reported in the last 72-hours bringing to a total of 15 the confirmed cases of COVID-19 in Kenya.
- Of the 8 latest cases, 5 are Kenyan Nationals while 3 are foreigners (2 French and 1 Mexican). All are imported cases from Europe and America and are of ages between 20 and 57. They came through JKIA between March 4 and March 17. All have all been isolated at various facilities and are being monitored.
- Government tracing 363 persons believed have come into contact with the latest patients. 3 more people are waiting processing at Mbagathi hospital.
- The seven earlier confirmed COVID-19 cases are still undergoing treatment and stable with their progress being monitored as well as individuals who have had contact with them.

Further directives and reinforcements.

- All international flights are suspended effective Wednesday, March 25th with exception of cargo flights whose crew must observe strict safety guidelines. Those coming before then will undergo mandatory quarantine at their own expense.
- Countries wishing to evacuate their nationals advised to make their arrangements to do so within this period.
- Kenyans currently in foreign countries who will not have come back within the said period are advised to observe the guidelines issued in their respective countries.
- Persons violating self-quarantine to be forcefully quarantined and thereafter arrested and charged in court. Order also applies to senior government officials.
- All bars to remain closed until further notice. Order effective from midnight. Police to enforce directive.
- Restaurants remain open but to offer take away services only.
- Religious gatherings in churches, mosques, shrines suspended. Burials restricted to close family members only. Police to enforce order.
- PSVs to adhere to new directives as communicated in previous briefing or risk licenses being revoked.
