COVID-19 PREVENTION ADVICE

COVID-19 is a new viral disease leading to respiratory complications and could lead to death.

COVID-19 is a communicable disease spread through droplets from cough, sneezing or fluids from an infected person or contaminated surfaces.

Common Symptoms of COVID-19 are fever, cough, headache, difficulty in breathing and sneezing. These may appear within 14 days of infection.

Visit the nearest health facility for screening if you suspect COVID-19 infection.
